FAREWELL JOHN

Welcome, David Goodrum!

Welcome to our new **Director of Academic Technology, David Goodrum**. David comes to OSU from Indiana University where he was the Director of Teaching and Learning Technologies. His background in educational theory, design, and practice as well as his engagement with national groups including The Educause Learning Institute (ELI) and UNIZIN bring a variety of strengths to OSU.

Want to engage your students in media literacy learning outcomes but not sure where to start? Interested in creating dynamic instructional media content? From in-class workshops on the latest digital creation tools and access to media equipment, to graphics consulting and large format poster printing, **SMS** is your multi-media support team. We're excited to help you create, connect and integrate academic technology to create a transformative learning experience for your students.

Student Multimedia Services

Media Services

Media Services (MS) provides students, faculty and staff access to audio and video services for academic and business purposes. We assist in creating your content, connecting with your audience, and integrating services to your specific needs; including radio, television, web applications, and DVD. Media Services supports campus events using videoconferencing, live streaming via live.oregonstate.edu, and recording to playback video on demand for your online audience.

Kristina Case, Associate Director / 541.737.2121

Learn@OregonState

Learn@OregonState is a dynamic learning ecosystem that allows the OSU community to manage a broad array of teaching and learning resources that are integrated with Canvas. Check out the website for tutorials, videos, webinars and more for Canvas, Kaltura, Clickers, publisher content, and Turnitin.

learn.oregonstate.edu / learn@oregonstate.edu

The **Learning Platform Services (LPS)** team provides technical, operational and user support for Learn@OregonState. We work closely with faculty, advisors, staff and students to ensure you can make the best use of Canvas and the integrated tools. Our goal is to keep Learn@OregonState dynamic, effective, and aligned to OSU's teaching and learning mission.

Lynn Greenough, Associate Director / lynn.greenough@oregonstate.edu

Learning Platform Services

Technical Services

As an Instructor who is leveraging technology to enhance the learning experience, it can be hard to keep up with all of the changes. We in Academic Technology **Technical Services (TS)** strive to ensure that all of your tools, and associated infrastructure, are tuned for performance across campus. Where technology may be used to enhance the OSU experience, count on **TS** to partner with you for success.

Marc Cholewczynski / 541.737.6542

Our mission is to provide immediate access to presentation systems for instructors and students in General Purpose (GP) classrooms. **CTS** maintains, supports and services 142 GP classrooms and co-supports 303 departmental classrooms, labs, conference rooms, seminar rooms and informal collaborative spaces at OSU, OSU-Cascades, and Hatfield Marine Science Center. All GP spaces and many departmental spaces are featured with a ring-back phone to our Presentation Support Center.

Classroom Technology Services

As an instructor you need to keep pace with technological change even as the knowledge in your own discipline progresses. **TAC** is your teaching and learning with technology partner. When it comes to exploring new techniques or using established technologies in new ways, we will work with you to think through the problems, find solutions, and assess the outcomes. **TAC's** got your back!

Jon Dorbolo, Associate Director
jon.dorbolo@oregonstate.edu

Technology Across the Curriculum

We at AT bid a fond adieu to **John Greydanus** as he retires from Director to lead new projects at OSU. John took the reigns as Director in 2004 and successfully shaped a high-functioning team to serve OSU's academic technology needs. We of AT are grateful for his leadership.

Farewell John!

We are co-located with Academic Technology on the fourth floor of the Learning Innovation Center (LINC). **CTL** provides all OSU educators with sound research-based support and kind encouragement. **CTL** events are differentiated to better meet educators immediate and long term needs. Quarterly on-campus symposia are informational; workshops support faculty in designing and refining practices, and quarter-long Professional Learning Communities focus on the acquisition and application of new pedagogical skills.
