Document Camera / Visualizer

Use the tab to RAISE and LOWER the camera head, by pushing up or pulling down.

If this symbol appears in lower right corner of white platform, this can be used as a white board with dry erase pens – pens and eraser are not provided.

Document Camera Head Controls
Zoom Control: Enlarge or shrink image
Freeze Frame: Image displayed will stay projected when “FREEZE” is selected. When pressed again, projector will display the new live current view.
Focus− or Focus+: Manual focus
AF: Auto focus
Extern MENU: Unassigned
Choosing a SOURCE to Display
The SOURCE button allows you to select the device you wish to use with the projector.

- **Computer**
- **Document Camera/Visualizer**
- **DVD Player**

Connecting your personal laptop, use VGA cable from CABLE CUBBY directly behind Monitor/Computer. Adapters to VGA or DVI are not provided.

Audio Controls
Select the AUDIO button from the main menu to access the audio controls for computer and microphone volume.

- **Playback Volume**
- **Speech Volume**

If there is no sound, make sure MUTE button has not been selected. From here you can control the speech or playback volumes using the buttons for each.

Screen Height Controls
Select the SCREEN button from the main menu to access controls that allow you to raise or lower the projector screen.

- **Raise**
- **Stop**
- **Lower**

Document Camera/Visualizer
Select the DOC CAM button from the main menu to access options that affect what your audience is able to see on the projector screen.

- **Blank Image**
- **Image Normal**
- **Auto-Image**

**Freeze On:** Allows you to show a blank screen to the audience on the projector. You can still see and use your device, the audience cannot.

**Freeze Off:** Reverses the Freeze On button. Audience can now see a live image of what is displayed on your device.

**Image Normal:** Reverses the Blank Image button. Audience can now see what is displayed on your device.

Projector Display Options
Select the PROJECTOR button from the main menu to access options that affect what your audience is able to see on the projector screen.

- **Freeze On**
- **Freeze Off**
- **Blank Image**
- **Image Normal**

**Freeze On:** Freezes the image on the projector. You can still see and use your device, the audience only sees the frozen image.

**Freeze Off:** Reverses the Freeze On button. Audience can now see a live image of what is displayed on your device.

DOC CAM Controls
From the main menu, select the SOURCE button, then from the source menu select the DOC CAM button.

- **Zoom +**
- **Zoom -**
- **Focus +**
- **Focus -**
- **Text Enhance**
- **Negative**
- **Auto-Focus**
- **35 mm Slide**
- **Iris +**
- **Iris -**

DVD/VHS/BLU-RAY Controls
From the main menu, select the SOURCE button, the select DVD or VHS source. Your projector will display from this device and the control panel will appear on the touch screen (you will need to remote to control the DVD player, however).

- **Playback Title**
- **Menu**
- **Previous**
- **Next**
- **Pause**
- **Fast Forward**
- **Rewind**
- **Stop**

Logout Control
Logging out of the Crestron controller is important to allow the equipment properly to cool down for the next user.

- **Log Out**

Restarting Computer
Restarting the computer puts the computer back in a ready state for next lecturer.

- **Yes**
- **No**

One moment please while equipment powers down.
