MATLAB Annual License Renewal

Your MATLAB license will expire each year on January 1, but have a built in 30-day grace period. You will need to re-activate MATLAB using a new Activation Key.

Before You Start make sure you have:
- 2016 Activation code (ONID login required)
- You will need your mathworks.com username (usually your ONID email address) and password. (You should already have a mathworks.com account from the last time you activated or installed MATLAB.)

Getting Help
All support for MATLAB installation is available at MathWorks: http://www.mathworks.com/support/

Launch MATLAB, and run Help > Licensing > Activate Software.

*You may also run the Activation Wizard manually (release R2015b is illustrated; adjust appropriately for a different release):
  o Linux: /usr/local/MatLabR2015b/bin/activate_MATLAB.sh
    (location may vary if you did not accept the default settings during installation)
  o Mac: Open the Applications folder. Right-click on MATLAB_R2015b, and choose Show Package Contents. Double-click on the Activate icon.
  o Windows: Start Menu > Programs > MATLAB R2015b > Activate MATLAB

The activation wizard will start.
Select Activate automatically using the internet.
Click Next.
You will be prompted to log in to your MathWorks.com account.

Click **Next**.

You may be prompted to select the license to associate the renewal.

If so, select the appropriate **Total Academic Headcount license**, either **Student** or **Faculty/Staff**.

Click **Next**.

(Otherwise, you will skip this step)

Enter the activation key.

Click **Next**.

Don't have the activation key? Scroll back to the top of the page.
Enter the username of the user who will run MatLab. You should usually accept the default value, unless you normally log in to this computer with a different username than the one you're currently using.

Click **Next**.

If you need to run MATLAB as a different user, you can re-activate it as that user.

The activation wizard will prompt you to confirm the information you have entered.

Click **Next**.

The activation wizard will finish and offer to start MATLAB.

Click **Finish**.

After a few moments, MATLAB should launch automatically.

MATLAB will now also be available in the Start Menu and on your Desktop.
