Document Camera Head Controls

Zoom Control: Enlarge or shrink image
Freeze Frame: Image displayed will stay projected when “FREEZE” is selected. When re-pushed projector will display the new live current view.
Focus- or Focus+: Manual focus
AF: Auto focus
Extern MENU: Unassigned

Accessories Cable Cubby: Located directly behind computer. VGA, DVI, AUDIO cables. Adapters not provided.

Shelf: Located next to the DVD player. Contains wireless mouse, DVD remote, wireless microphone (lapel), and extra batteries.
Choosing a SOURCE to Display

The SOURCE button allows you to select the device you wish to use with the projector.

- **Source button**: Select Sources to Display

  - **Right Projector**: Computer on podium (monitor is the computer. ON/OFF button is on the backside lower left).
  - **Left Projector**: Connecting your personal laptop, use VGA cable from CABLE CUBBY directly behind Monitor/Computer. Adapters to VGA or DVI are not provided.
  - **Doc Cam**: DVD Player (remote control is required to operate player).

  - **Screen button**: Select the SCREEN button from the main menu to access controls that allow you to raise or lower the projector screen.

  - **Screen controls**: Raise, Stop, Lower.

LOGOUT Control

Logout of the Crestron controller is important to allow the equipment to cool down for next lecturer to have equipment available.

- **Logout**: Are you sure you want to log off?

PROJECTOR Display Options

Select the PROJECTOR button from the main menu to access options that affect what your audience is able to see on the projector screen.

- **Projector button**: Select the PROJECTOR button from the main menu to access options that affect what your audience is able to see on the projector screen.

  - **Blank Image**: Allows you to show a blank screen to the audience on the projector. You can still see and use your device, the audience cannot.
  - **Image Normal**: Reverses the Blank Image button. Audience can now see what is displayed on your device.
  - **Freeze On**: Freezes the image on the projector. You can still see and use your device, the audience only sees the frozen image.
  - **Freeze Off**: Reverses the Freeze On button. Audience can now see a live image of what is displayed on your device.

DOC CAM Controls

From the main menu, select the SOURCE button, then from the source menu select the DOC CAM button.

- **Doc Cam**: Document Camera/Visualizer (overhead camera to view 2D or 3D objects).

DVD/VHS/BLU-RAY Controls

From the main menu, select the SOURCE button, the select DVD or VHS source. Your projector will display from this device and the control panel will appear on the touch screen (you will need to remote to control the DVD player, however).

- **DVD/VHS**: DVD Player (remote control is required to operate player).

AUDIO Controls

Select the AUDIO button from the main menu to access the audio controls for computer and microphone volume.

- **Audio**: If there is no sound, make sure MUTE button has not been selected. From here you can control the speech or playback volumes using the buttons for each.

- **Screen**: Select the AUDIO button from the main menu to access the audio controls for computer and microphone volume.

- **Screen controls**: Raise, Stop, Lower.

SCREEN HEIGHT Controls

Select the SCREEN button from the main menu to access controls that allow you to raise or lower the projector screen.

- **Screen controls**: Raise, Stop, Lower.

RESTARTING Computer

Restarting the computer puts the computer back in a ready state for next lecturer, if you only logout this can make the next presenter delayed as the system takes fair amount of time to reboot.
